Note J Multi-Channel Details (Check with your MES Dealer or Service Provider if you need to complete this section).

A Multi-Channel MES is composed of several MESs that are connected to only one antenna. It allows the customer to send calls on one MES and receive calls on another MES simultaneously. This is in contrast to a single-channel MES where a customer is not able to receive a facsimile whilst the telephone is being used.

If the MES applied for is the Primary Channel do not complete this section. However, if the MES is a 'secondary channel' complete the relevant area in Section 4 and enter the primary IMN (for Inm-A) or primary ISN (for Inm-M/B/mini-M) in this section.

Note: if applying for the Primary and secondary channels at the same time, complete separate forms for each Channel. For Inmarsat-A, the IMN of the primary channel at this point is not known. Customer must ensure that all the Inmarsat-A registration forms for the secondary channels are attached firmly to the registration forms for the Primary channel.
